SAMPLE QUERIES: Gym Management System

1. ***INSERT (MEMBER SIGNUP):***

   INSERT INTO member (name, age, gender, phone, password, join_date) VALUES ('Aditya Sahoo', 20, 'Male', '9876543210', 'pass123', '2026-04-12');

2. ***GET MEMBER DETAILS: (Member Dashboard)***

   - SELECT name, phone, age FROM member WHERE member_id = 1;
   - SELECT name FROM trainer WHERE trainer_id = (SELECT trainer_id FROM member WHERE member_id = 1);
   - SELECT type FROM membershipplan WHERE plan_id = (SELECT plan_id FROM member WHERE member_id = 1);

3. ***ATTENDANCE MARKING (with one day restriction logic)***

   - To check If the date Is already marked:
     - SELECT * FROM attendance WHERE member_id = 1 AND date = '2026-04-12';
   - If date doesn't exist, add into MySQL:
     - INSERT INTO attendance (member_id, date) VALUES (1, '2026-04-12');

4. ***ATTENDANCE HISTORY:***

   SELECT date FROM attendance WHERE member_id = 1;

5. ***PAYMENT HISTROY:***

   SELECT amount, date FROM payment WHERE member_id = 1 AND status = 'Paid';

6. ***WORKOUT LIST:***

   SELECT exercises, date FROM workoutplan WHERE member_id = 1 ORDER BY date DESC;

7. ***UPDATE PROFILE:***

   UPDATE member SET name = 'Aditya Kumar', phone = '9999999999', age = 21 WHERE member_id = 1;

8. *TRAINER ASSIGNS WORKOUT (with one day restriction logic):*

- Check if already assigned:
    - SELECT * FROM workoutplan WHERE member_id = 1 AND date = '2026-04-12';

- If not:
    - INSERT INTO workoutplan (member_id, trainer_id, exercises, date) VALUES (1, (SELECT trainer_id FROM member WHERE member_id = 1), 'Push-ups, Squats', '2026-04-12')

9. *TRAINER EARNINGS:*

```
SELECT SUM (
  CASE
    WHEN mp.type = 'Monthly' THEN mp.price * 0.30
    WHEN mp.type = 'Quarterly' THEN mp.price * 0.50
    WHEN mp.type = 'Yearly' THEN mp.price * 0.60
  END
) AS total_trainer_earning
FROM member m
JOIN membershipplan mp ON m.plan_id = mp.plan_id
WHERE m.trainer_id = 1;
```
